

Moratorium for the roll out of the 5G network

In our current world we have many laws and by-laws and legislation for what we can and can't do. There are other older aspects of law that are still in force. All our old laws are stronger than our current laws (what comes first in law overrides what comes after).

When We the People don't like what the government is doing, we sign a petition. If there are enough signatures the politicians may listen if they think it will win them votes. But petitions are not legally binding. The following documents of 'Will and Intent of the People' are legally binding documents.

They must be done precisely to hold legal weight. This 'Will and Intent of the People' is about a moratorium on the roll out of the 5G network. If we get this right, it will mean that We the People can direct the government. If this works we will be able to use this where we need to.

The government are only facilitators of the People's Will. They are not our controllers. This is how government is meant to work.

These are to be sent to the Minister for Communications and to your local Federal Minister. It would be great to see more than 100,000 of these sent to the Minister for Communications.

So please send one for every member of your family and make this go Viral.

1.

How to use Will and Intent of the People.

Contained in this document. Page two: Cover letter to Paul Fletcher. Page 3: Will of the People to Paul Fletcher. Page 4: Will of the People blank(fill in and send to your local Federal Minister). Page 5: Cover letter to your local Federal Minister.

How is government supposed to operate?

Is it that we elect them and leave them alone? They do things we don't like and we complain then we wait to the next elections to sort it out.

Is this system working? To me, NO it is not.

To me, our current system is close to a dictatorship. Our current government only operate this way because they and We the People have forgotten what the government is.

Is there another way? YES.

In fact, the government are facilitators of the Peoples Will.

So we should elect our Representative during an election and then during their term in office We the People give them directives and they then facilitate The Will of the People.

Attached is a Pro-forma of Will and Intent of the People.

How to Use.

This pro-forma is for 5G.

1. Fill in your details correctly. They must be correct or it will not be counted.
2. Fill in the details of the politician you are sending it to. In this case you need to send one to your local Federal Minister and one to the Minister for Communications.

Hon Paul Fletcher MP

Member for Bradfield, New South Wales, Minister for Communications, Cyber Safety and the Arts
Suite 1, Level 2, 280 Pacific Highway

Lindfield,

NSW, 2070

3. Send them using registered mail, with a return receipt that comes back to you. If you can't afford this then please send it normal mail or email.
4. Then please send an email stating that you have sent these 2 letters. Please include your name and postcode and electorate that you live in. Send the email to seen.5Gwill@protonmail.com
5. Page 2 and 5 are cover letters. You can use this one or you can write your own, but please keep it brief and concise, or don't send a cover letter.

Dear Paul,

I have heard many differing opinions about how great 5G will be and also that there could be some very dire health effects on humans and all living things.

I have done my own diligent research, and it appears that there is enough evidence and concern by thousands of doctors and scientists, and I also see many cities and even countries starting to ban the roll out of 5G. This means that 5G has a potential to be bad to devastating.

For this reason, I am calling on you to enact the Precautionary Principle, and call a halt to the roll out of all 5G equipment and associated equipment, and that the whole 5G network is turned off, until there is proper testing to prove beyond any doubt that there is no harm coming from 5G.

Here are 2 links for you to look at.

I am writing to you today with my concerns about the possible harm that may come from the entire 5G communications networks radio frequencies. There is enough concern and information that we need to bring into relevance the Precautionary Principle.

As an elector, it is my duty to inform you that It is My Will and My Intent that you institute a moratorium on the roll out of all of the 5G network (5G Towers, 5G Nodes, 5G Modems, 5G street lights and all other 5G emitters) and a turning off of all of the above 5G modalities, until there is complete research that shows all the harms and safeties of all of the 5G equipment.

Yours Truly
